Gym Tracker

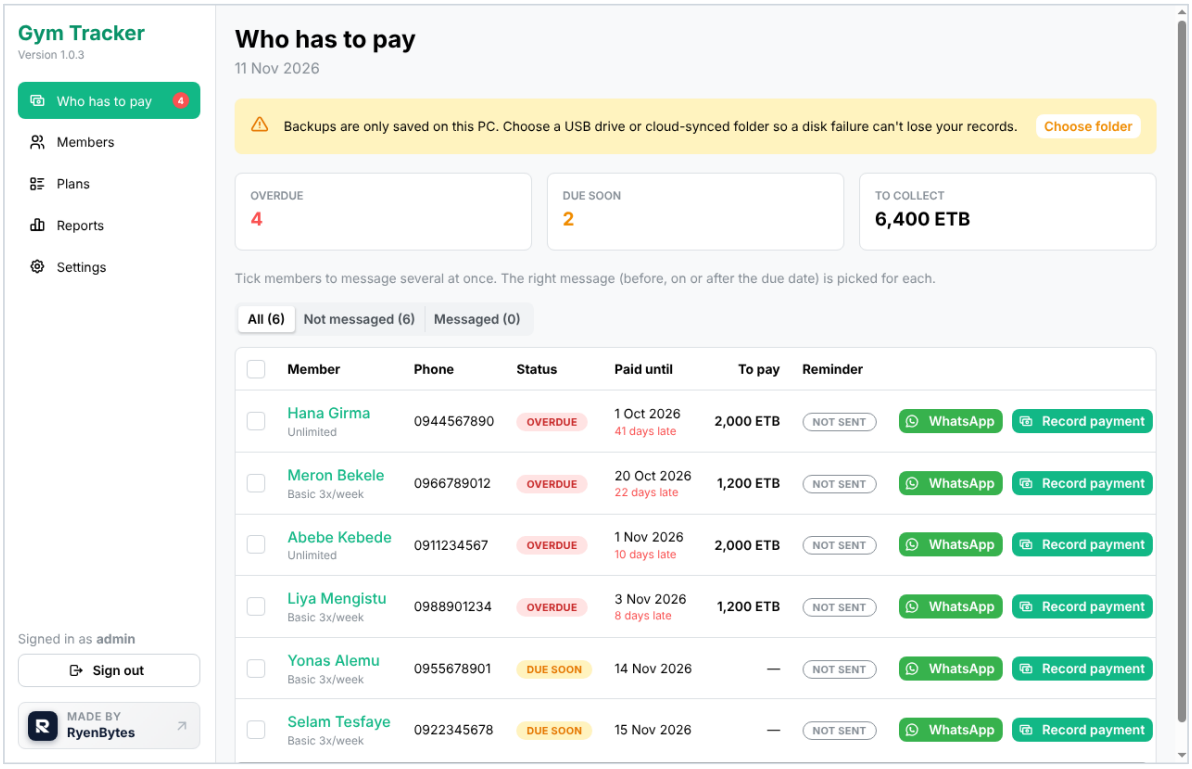

User guide for the front desk

Version 1.0.3 - Made by RyenBytes

What Gym Tracker does

Gym Tracker is a desktop app for the gym front desk. It keeps your list of members, the plan each one is on, and every monthly payment. At any moment it tells you **who has paid, who is due soon and who owes money**, and it can send each member a polite WhatsApp reminder.

Everything stays on your own Windows PC. The app works without internet, saves a backup copy of your records every day, and updates itself.

The "Who has to pay" screen: the first thing you see after signing in.

In this guide: 1. Getting started - 2. Daily work - 3. Members - 4. Plans - 5. Reports - 6. Settings and backups - 7. Good to know

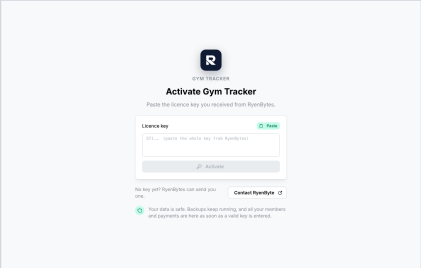

1. Getting started

You only do these steps once, the first time you open the app.

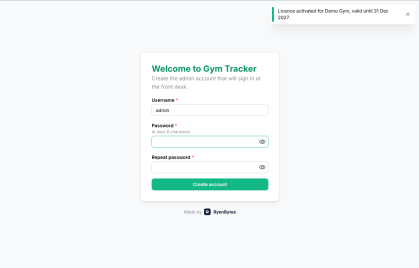

1. Licence key. Paste the key you received from RyenBytes and click **Activate**. No key yet? Click **Contact RyenBytes**.

2. Admin account. Choose a username and a password (at least 6 characters). This is the account you sign in with at the front desk.

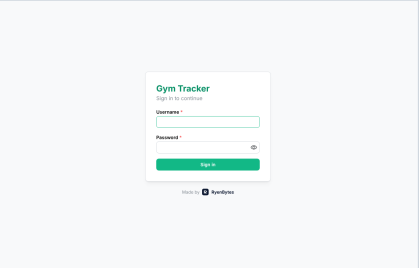

3. Sign in. Each time the app opens, sign in with your username and password. Click **Sign out** (bottom left) when you leave the desk.

1. Activate

2. Create the admin

3. Sign in

> **Tip:** before adding members, open **Settings** and fill in your gym name, currency (e.g. ETB) and phone country code (e.g. 251). Then create your plans under **Plans**.

2. Your daily work

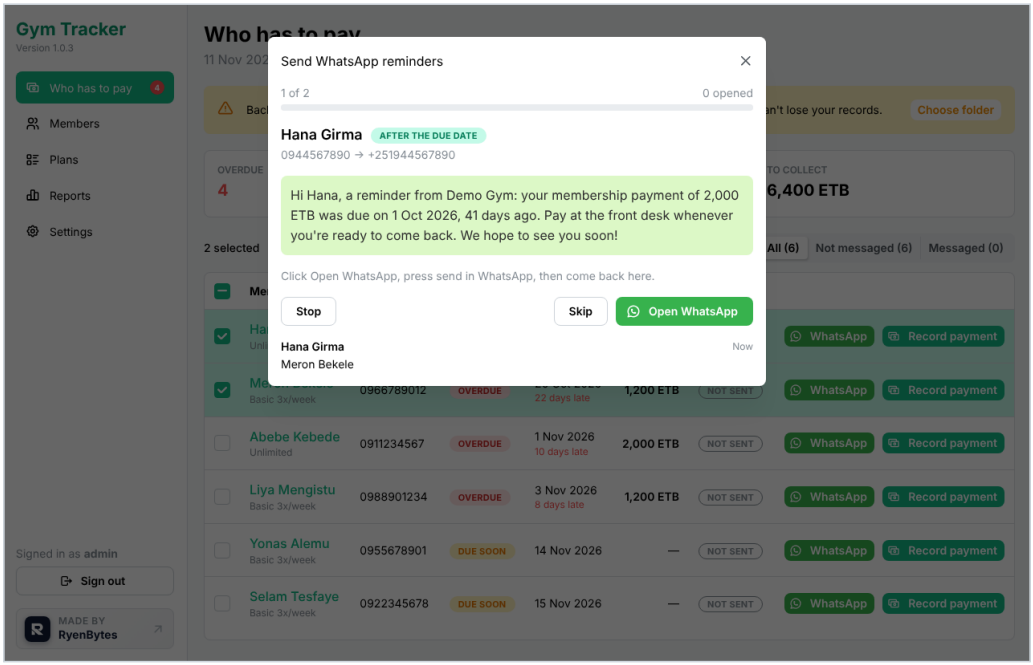

Who has to pay

This screen lists every member who must pay now or soon. The boxes at the top show how many are **overdue**, how many are **due soon**, and the total money **to collect**. The red number next to "Who has to pay" in the menu is the number of overdue members.

- **Overdue** (red): the paid time has run out. The table shows how many days late.
- **Due soon** (yellow): the paid time ends in the next few days (5 by default; change it in Settings).
- **Reminder** column: shows if you already sent this member a WhatsApp message.

Send WhatsApp reminders

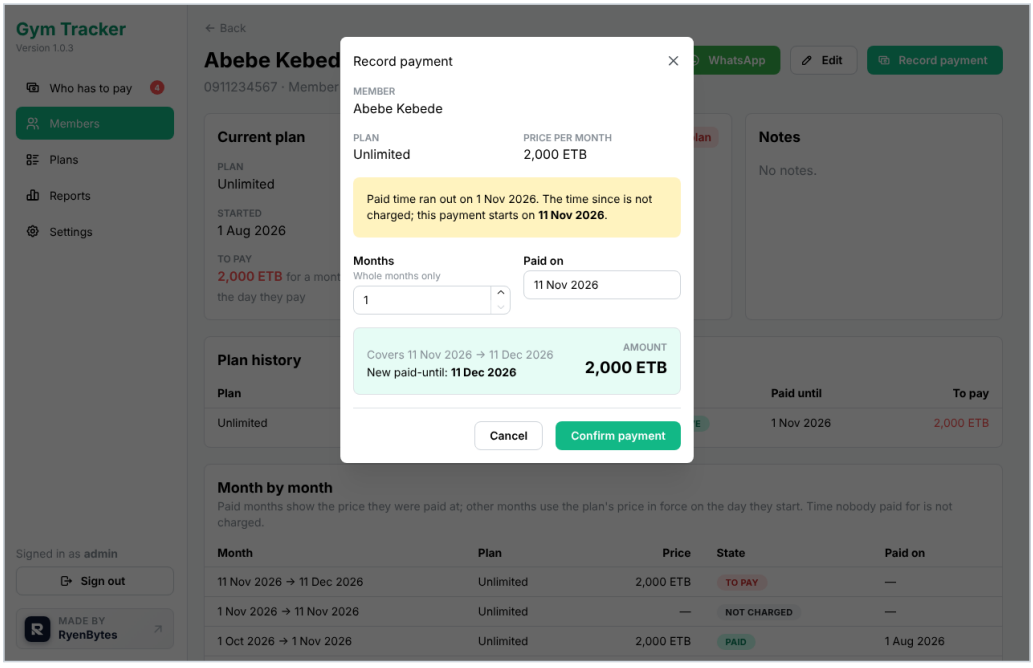

Click **WhatsApp** on one member, or tick several members and click **Message on WhatsApp**. The app writes the right message for each person: before the due date, on the day, or after it. Click **Open WhatsApp**, press send in WhatsApp, then come back for the next person.

Sending reminders to two members, one after the other.

Record a payment

When a member pays, click **Record payment**. Choose how many months they pay for and check the date. The green box shows the amount to take and the new **paid-until** date. Click **Confirm payment**.

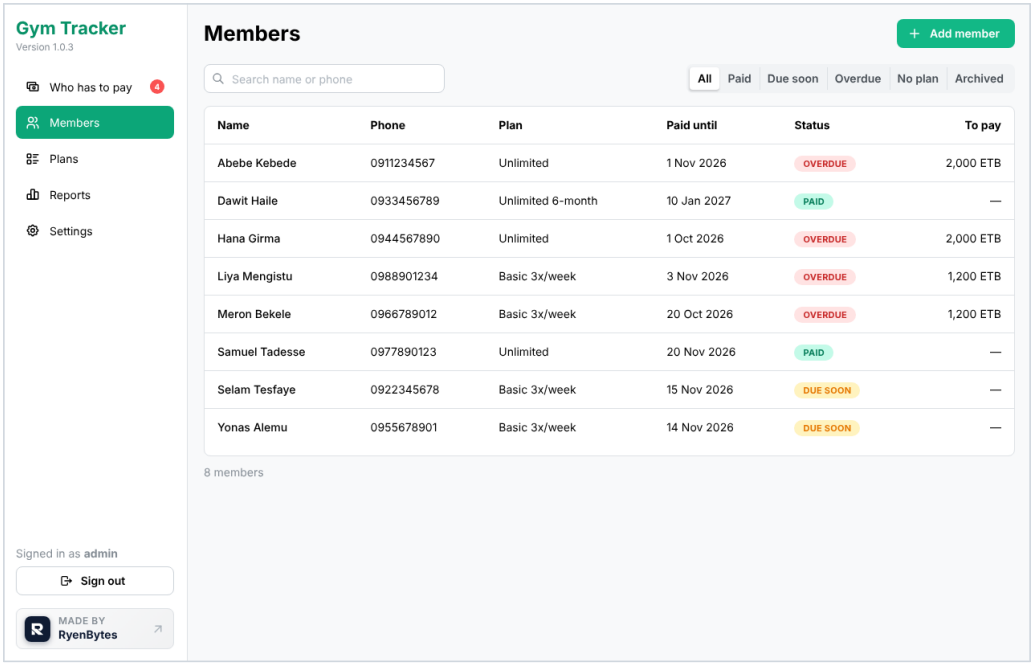

Recording a 1-month payment. The app works out the amount and dates.

> **Late payments are fair:** if a member comes back after their paid time ran out, the days they missed are not charged. The new month starts on the day they pay, and the app tells you so in a yellow box.

Made a mistake? Open the member, find the payment and **void** it with a short reason. Nothing is ever deleted without a record.

3. Members

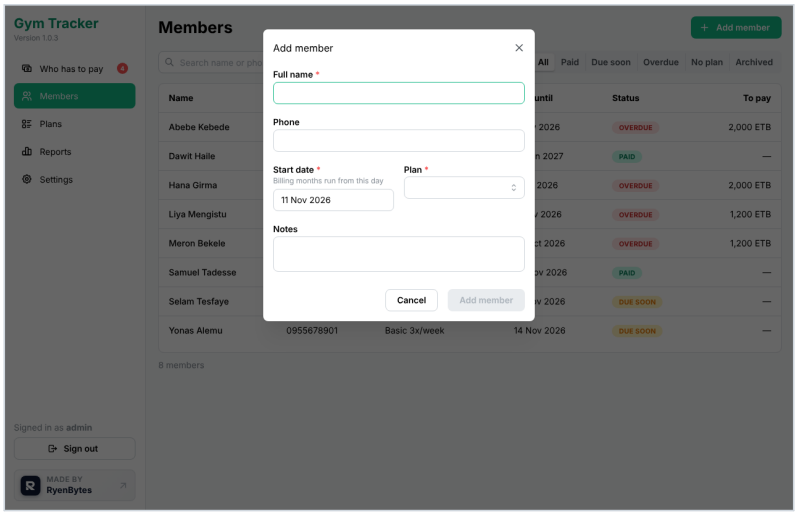

The **Members** screen lists everyone. Type in the search box to find a name or phone number, or use the buttons (Paid, Due soon, Overdue, No plan, Archived) to filter the list.

All members with their plan, paid-until date and status.

Add a new member

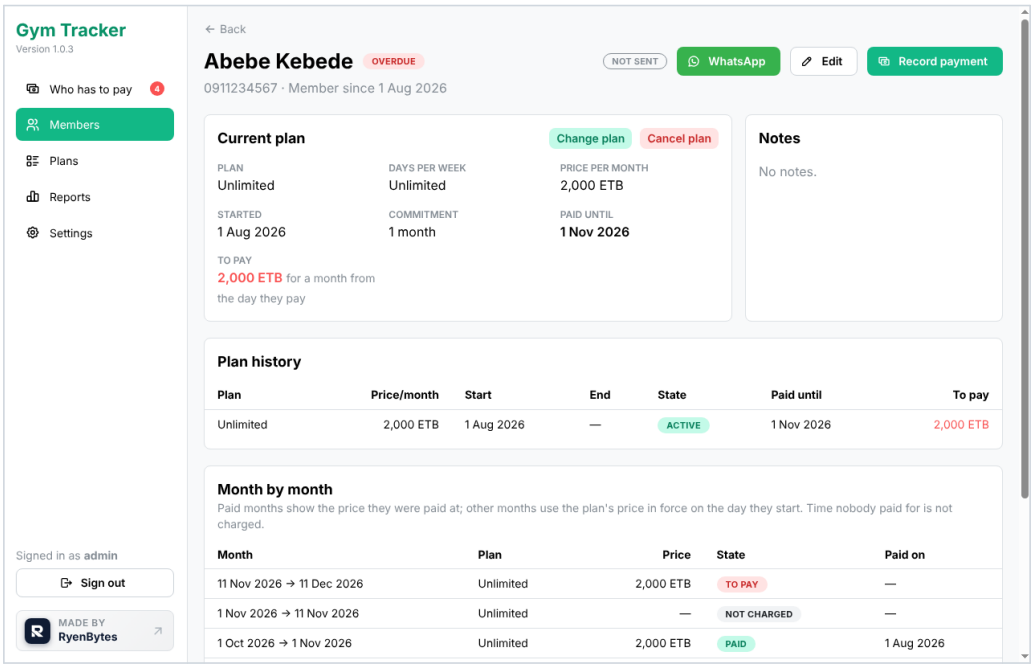

Click **Add member**. Enter the full name, phone number, start date and plan. The billing month runs from the start date (e.g. the 14th to the 14th). Then record their first payment.

The Add member form.

The member page

Click a member to see everything about them: current plan, what they owe, the history of plans and a month-by-month table of what was paid. From here you can **Edit** their details, **Change plan**, **Cancel plan**, send a **WhatsApp** reminder or **Record payment**.

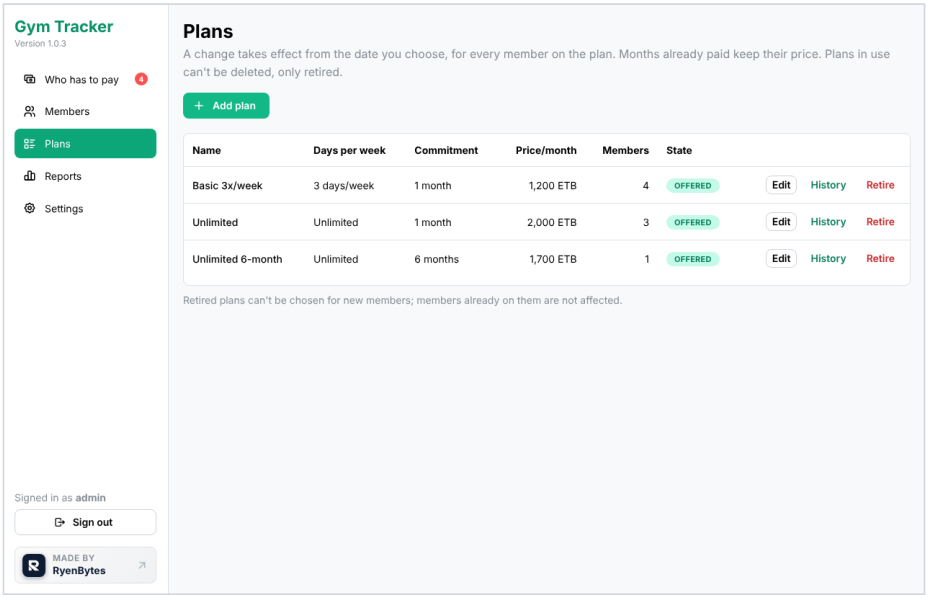

One member's page.

> Members who leave can be **archived** with **Edit**. Their history is kept and they can come back at any time.

4. Plans

A plan is what members pay for, for example "Basic 3 days a week, 1,200 ETB a month". For each plan you set the days per week (or unlimited), the commitment in months, and the monthly price.

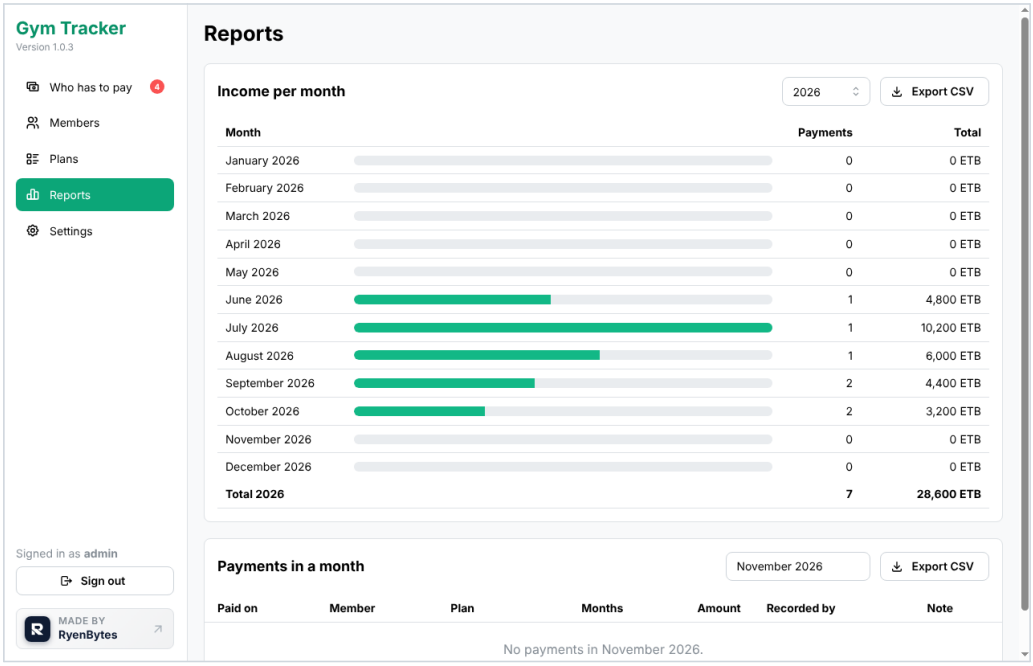

- **Add plan** to create a new one.
- **Edit** to change the price. The new price starts on the date you choose; months already paid keep their old price.
- **History** shows every past price.
- **Retire** a plan you no longer sell. Members already on it are not affected.

The Plans screen.

5. Reports

Income per month shows how much money came in each month of the year, with a bar for each month. **Payments in a month** lists every payment: date, member, plan, amount and who recorded it. Use **Export CSV** to open the numbers in Excel.

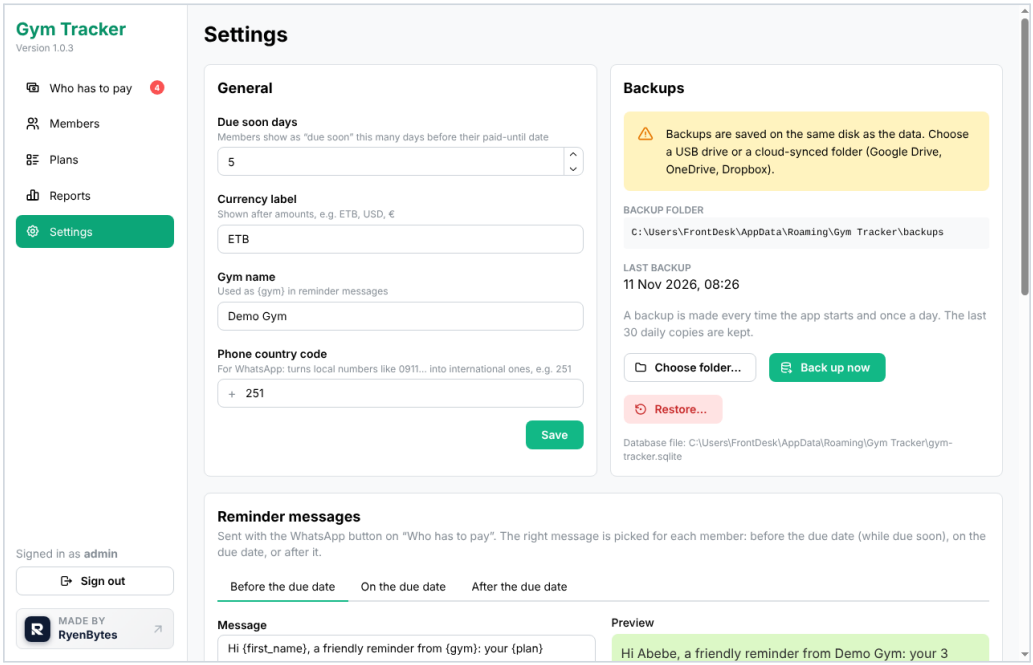

Income per month for 2026.

6. Settings and backups

General

- **Due soon days**: how many days before the end a member shows as "due soon".
- **Currency label**: shown after every amount (e.g. ETB).
- **Gym name**: used in the reminder messages.
- **Phone country code**: turns numbers like 0911... into WhatsApp numbers (+251911...).

Settings: general options and backups.

Backups

The app saves a copy of all your records every time it starts and once a day, and keeps the last 30 copies. Click **Back up now** at any time. If something goes wrong, **Restore...** brings back an earlier copy.

> **Important:** click **Choose folder...** and pick a USB drive or a cloud folder (Google Drive, OneDrive, Dropbox). If the PC breaks, your records are safe there. Until you do this, a yellow reminder shows on the home screen.

Lower on the Settings page you can also change the **reminder messages**, add more **admin users** and see the **licence** and app version.

7. Good to know

Do I need internet?	No. Internet is only needed for WhatsApp messages and for automatic updates.
How do updates work?	The app downloads new versions by itself and installs them when the PC has not been used for a few minutes. You stay signed in. Nothing to click.
Where are my records?	In one file on this PC, plus the backup copies. Nobody else can see them.
What happens when the licence ends?	The app locks the day after the end date, but your data is safe and backups keep running. Enter a new key from RyenBytes (Settings, Licence) and everything is back.
Can two people use it?	Yes. Add a second admin under Settings, Admin users. Each payment shows who recorded it.
A payment was entered wrong.	Open the member, void the wrong payment with a reason, then record the right one.

Need help?

Contact **RyenBytes**, the maker of Gym Tracker, using the **Made by RyenBytes** button at the bottom of the menu.

The names and numbers in the pictures are examples.
